interaction of electromagnetic radiation with matter. Spectroscopic methods can be based on phenomena of emission, absorption, fluorescence or scattering.<sup>1, 3</sup> Different spectroscopic methods are frequently used for the characterization of a wide range of samples of forensic interest. Raman spectroscopy â€“ Basic principle, instrumentation and ... - A major step in highlighting the significance of tactile sensing technology and its possible applications was taken by Harmon in 1980 with his review . The potential of this technology was further emphasized by two more papers which followed shortly afterwards , . The unavailability of any design criteria was still a major obstacle to progress. A review of tactile sensing technologies with applications ... -
